

WEBINAR

FEBRUARY 2021

THURSDAY 11th 5.30-8.30 pm CET

FRIDAY 12th 5.30-8.30 pm CET

PROGRAMME

The 8th Multidisciplinary Update on Pathology and Orthopaedic Surgery in Musculoskeletal Tumors (BSTT: BONE AND SOFT TISSUE TUMORS MADRID COURSE: <https://bstt-madridcourse.com/>)

After the courses held in 2000, 2003, 2009, 2012, 2014, 2016 and 2019, there should have been a course February 10-13, 2021. However, due to the current situation, it is impossible to organize our course as it always has been, with its distinguishing feature of shared teaching and constant communication with the Faculty.

I am always reminded that the course is based on the precepts established by its founder, the extraordinary, Dr. Henry J. Mankin. Moreover, it is supported by the Musculoskeletal Tumor Society (MSTS: Musculoskeletal Tumor Society), and is one of the multidisciplinary courses with a great international repercussion.

The Webinar program, although shortened from the original course, is indeed exceptional and of high quality.

We regret that we cannot be together in person this year, but we think that everyone will enjoy the virtual presentations, which are most attractive from an academic point of view.

I encourage you to attend and to register.

*Dr. Eduardo J. Ortiz-Cruz
Course Director*
